

App. No. 10/655,815
Attorney Docket No. 3016.2.4 NP

Amendments to the Claims

1. (Currently Amended) A vehicle designed to implement application of a cleaning solution to a remote textile area to be cleaned, the vehicle comprising:
 - a) a storage system, positioned in the vehicle, and designed to hold the cleaning solution;
 - b) a delivery system fluidly coupled to the storage system to enable delivery of the cleaning solution to the textile area to be cleaned; and
 - c) an effluent storage system, positioned in the vehicle, and designed to hold dirty cleaning solution that has been extracted from the textile area[.]; and
 - d) a cleaning solution air compressor system fluidly coupled to the storage system, and configured to move the cleaning solution from the storage system, through the delivery system and to the effluent storage system.
2. (Original) The vehicle of claim 1, further comprising a vehicle engine designed to transport the vehicle on community roadways.
3. (Original) The vehicle of claim 2, further comprising a mixing chamber, coupled to mix the cleaning solution before application to the textile area.
4. (Original) The vehicle of claim 3, further comprising a heating system, positioned in the vehicle, and coupled to receive the cleaning solution from the mixing chamber.
5. (Original) The vehicle of claim 4, wherein the delivery system comprises a cleaning applicator, coupled to receive and then apply the heated cleaning solution to the textile area to be cleaned.
6. (Original) The vehicle of claim 5, further comprising a cleaning solution vacuum system, associated with the cleaning applicator, and designed to remove the applied heated cleaning solution from the textile area and deposit the dirty cleaning solution into the effluent storage system.

Attorney Docket No. 3016.2.4 NP

7. (Original) The vehicle of claim 6, wherein the cleaning solution is a carbonated cleaning solution that effervesces upon exiting the delivery system.
8. (Canceled)
9. (Original) The vehicle of claim 8, wherein the cleaning solution is a carbonated cleaning solution employing a mixture of an acidic and a basic solution that effervesces upon release from the delivery system and onto the textile area.
10. (Canceled)
11. (Canceled)
12. (Canceled)
13. (Canceled)
14. (Canceled)
15. (Canceled)
16. (Currently Amended) A cleaning vehicle for remote cleaning of a textile area, comprising:
- a) a storage system, positioned in the vehicle, and designed to hold the cleaning solution; and
 - b) a delivery system fluidly coupled to the storage system to enable delivery of the cleaning solution to the textile area that is remote to the vehicle, the delivery system having a flow rate less than 1.5 gallons per minute of cleaning solution while being applied to the textile area.

App. No. 10/655,815
Attorney Docket No. 3016.2.4 NP

17. (Original) The cleaning vehicle of claim 16, further comprising a vehicle engine designed to transport the vehicle on transportation roadways.

18. (Original) The cleaning vehicle of claim 17, wherein the cleaning solution is a carbonated cleaning solution employing a mixture of an acidic and a basic solution that effervesces upon release from the delivery system and onto the textile area.

19. (Original) The cleaning vehicle of claim 18, further comprising an effluent storage system, positioned in the vehicle, and designed to hold dirty cleaning solution that has been extracted from the textile area.

20. (Canceled)

21. (Canceled)

22. (Canceled)

23. (Canceled)

24. (Canceled)

25. (Original) A vehicle using a reduced amount of cleaning solution for cleaning of a textile area that is remote to the vehicle, comprising:

a) a storage system, positioned in the vehicle, and designed to hold the cleaning solution; and

b) a delivery system fluidly coupled to the storage system to enable delivery of the cleaning solution to the textile area that is remote to the vehicle, the delivery system having a cleaning rate of at least 50 square feet of cleaned textile area per gallon of cleaning solution.

App. No. 10/655,815
Attorney Docket No. 3016.2.4 NP

26. (Original) The vehicle of claim 25, further comprising an effluent storage system, positioned in the vehicle, and designed to hold dirty cleaning solution that has been extracted from the textile area.
27. (Original) The vehicle of claim 26, further comprising a vehicle engine designed to transport the vehicle on transportation roadways.
28. (Original) The vehicle of claim 27, wherein the cleaning solution is a carbonated cleaning solution employing a mixture of an acidic and a basic solution that effervesces upon release from the delivery system and onto the textile area.
29. (Cancelled)
30. (Cancelled)
31. (Cancelled)
32. (Cancelled)
33. (New) The vehicle of claim 1, wherein the cleaning solution air compressor system further comprises:
- a) an air pressure pump, configured to move the cleaning solution from the storage system, through the delivery system and to the effluent storage system; and
 - b) a vacuum pump, configured to remove the cleaning solution from the textile area.
34. (New) The vehicle of claim 16 further comprising a cleaning solution air compressor system fluidly coupled to the storage system, and designed to move the cleaning solution from storage system, through the delivery system and to the effluent storage system.

App. No. 10/655,815
Attorney Docket No. 3016.2.4 NP

35. (New) The vehicle of claim 34, wherein the cleaning solution air compressor system further comprises:

- a) an air pressure pump, configured to move the cleaning solution from the storage system, through the delivery system and to the effluent storage system; and
- b) a vacuum pump, configured to remove the cleaning solution from the textile area.

36. (New) The vehicle of claim 28, further comprising a cleaning solution air compressor system fluidly coupled to the storage system, and designed to move the cleaning solution from storage system, through the delivery system and to the effluent storage system, the cleaning solution air compressor system comprising:

- a) an air pressure pump, configured to move the cleaning solution from the storage system, through the delivery system and to the effluent storage system; and
- b) a vacuum pump, configured to remove the cleaning solution from the textile area.
